

REGIONAL PROJECT MONITORING AND EVALUATION SYSTEM (RPMES)
KEY LESSONS LEARNED FROM ISSUES RESOLVED AND BEST PRACTICES
In 2026

Program/Project Title	Location	Implementing Agency	Problem/ Issue		Strategies/Actions Taken to Resolve the Problem/Issue	Responsible Entity/Key Actors and their Specific Assistance	Lessons learned and Good Practices that could be shared to the NPMC/Other PMCs
			Nature	Details			
Completion of Water Supply System at Brgy. Hampton Gandara, Samar	Brgy. Hampton, Gandara, Samar	Municipality of Gandara	Others	1. Transmission and Distribution Lines are exposed 2. Tapstand Faucets are broken 3. There was no Organization that manages the barangay water system 4. There was no funding for repair and rehabilitation	The LPMC suggested to the BLGU of Brgy. Hampton about what to do to maintain the quality of their water system service	The MLGOO with the LGOO offered a help for the upcoming Brgy. Hampton's Assembly in explaining what have been discussed during the monitoring and meeting. The effort is to make the residents understand the importance of maintaining the quality of the existing water system.	This recent inspection brought to light that not all barangays with water system projects have an organized committee or organization responsible for maintaining and optimizing the services of their water system. In addressing this institutional concern, the activity also demonstrated the spirit of genuine public service. The knowledge and expertise gained from higher levels of government should be shared with lower-level government offices when needed, in the spirit of cooperation and capacity-building. During the activity, barangay officials gained knowledge on the proper and lawful collection of fees to support the operation, maintenance, and improvement of their water system. The activity also emphasized the importance of establishing an appropriate organizational mechanism to ensure the sustainability and efficient operation of the water service.
