

**POST-ACTIVITY REPORT**

ACTIVITY:	Training on Local Roads and Bridges Inventory for Local Government Units
DATE:	September 8 – 10, 2026
VENUE:	Summit Hotel, Tacloban City
NO. OF PARTICIPANTS:	1, LPMC Member

REPORT SUMMARY**I. OBJECTIVES OF THE ACTIVITY:**

Accurate and updated inventories of local roads and bridges are critical components of local governance, development planning, and infrastructure management. This training was conducted to:

1. Equip local government personnel with the standardized methodologies, protocols, and tools required for conducting comprehensive local roads and bridges inventories.
2. Ensure proper data collection, mapping, and recording to support national and local infrastructure databases.
3. Enhance the capacity of LGU Tarangnan in formulating responsive local road network plans and maintenance programs.

II. HIGHLIGHTS OF THE ACTIVITY:

- Day 1: Orientation on the legal mandates, guidelines, and importance of the Local Roads and Bridges Inventory (LRBI). Discussions centered on standard data-gathering forms and preparation procedures.
- Day 2: Technical lectures and hands-on exercises concerning mapping tools, condition rating of roads and bridges, and data validation processes.
- Day 3: Synthesis of workshop outputs, open forum addressing LGU-specific challenges in infrastructure data collection, and closing ceremonies featuring the awarding of Certificates of Participation.

III. OUTPUT/S OF THE ACTIVITY:

- Acquired updated knowledge and technical skills on standard DILG road and bridge inventory protocols.
- Completed workshop outputs and sample inventory forms.
- Certificate of Participation awarded to Engr. Jeffrey S. Tan representing LGU Tarangnan, signed by Regional Director Arnel M. Agabe, CESO III.

IV. RECOMMENDATIONS/RELEVANT APPLICATION IN DILG (if any):

1. Orientation Cascade: Conduct an internal briefing with the Local Engineering Office and other relevant departments in LGU Tarangnan regarding the techniques and guidelines learned.
2. Comprehensive Local Inventory: Propose the execution of an updated, ground-level inventory of local roads and bridges within the jurisdiction of LGU Tarangnan utilizing the standardized DILG framework.
3. Database Integration: Integrate the gathered data into LGU Tarangnan's local development and infrastructure database for future project proposals and funding requests.
