Improvement of Multi-Purpose Building at Barangay Talisay	Brgy. Talisay	LGU-Bontoc	> Project Implementation/ Execution > Weather Condition > Site Condition	The main circuit breaker is lacking; although eight branches were specified, only six branches were installed. This is due to the variation orders made during the construction phase.	Variation order documents are verified and checked by the MPMC site inspection team and had found out that the changes on site and the documents were aligned.	BLGU, MLGU	> MPMC inspection schedule must be followed and performed regularly > Have a proper coordination with the contractor and the barangay (end-user) > Requests, permits and clearances must be completed by the contractor prior to implementation > Material testings and other necessary test must be completed > Contractor must provide sufficient and efficient workers and equipments during the construction
