Provincial Project Monitoring Committee

TO : PROVINCIAL PROJECT MONITORING COMMITTEE (PPMC) MEMBERS

SUBJECT : 1st QUARTER FIELD MONITORING

DATE : February 6, 2026

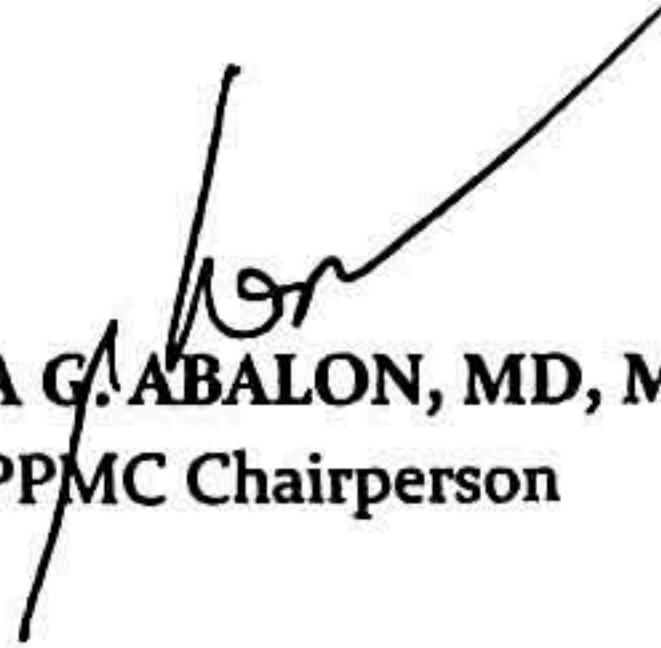

Please join the 1st Quarter Field Monitoring of the Provincial Project Monitoring Committee for PGNS-funded projects in the municipalities of Allen and Pambujan on the date and time stated below:

Project Title	Location	Cost	Schedule
Allen Municipal Wharf Project	Allen	P24,609,990.58	February 11, 2026, 8:00 AM
Construction of Evacuation Center	Brgy. Poblacion 1, Pambujan	35,407,900.00	February 12, 2026, 8:00 AM

Vehicle/s will be provided for the monitoring team.

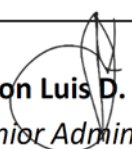

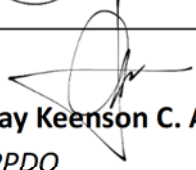

For queries and concerns you may contact Ms. Marilyn Bocboc at mobile no. 0956-6485393 or tel. no. 055-500-2336.

Your participation will be greatly appreciated.

HON. MARIA ANA G. ABALON, MD, MPH
Mayor/PPMC Chairperson

POST ACTIVITY REPORT

Title of the Activity	First Quarter Field Monitoring and Exit Conference for the Allen Municipal Wharf Project and Pambujan Evacuation Center
Conducted by	Provincial Government of Northern Samar – Provincial Project Monitoring Committee (PPMC)
Date and Place conducted	February 11, 2026 – Municipality of Pambujan, Northern Samar February 11 and 12, 2026 - Municipality of Allen, Northern Samar
Activity Objective	To inspect the ongoing construction of the Pambujan Evacuation Center; consolidate monitoring findings for both the Allen Municipal Wharf Project and the Pambujan Evacuation Center; and provide technical and administrative recommendations to ensure compliance with approved plans, quality standards, safety protocols, and implementation timelines.
Activity Rationale	The Provincial Project Monitoring Committee (PPMC) continued its First Quarter Field Monitoring at Pambujan Evacuation Center on February 12, 2026, following its inspection of the Allen Municipal Wharf Project on February 11, 2026. The activity included a site visit to the ongoing construction of the Pambujan Evacuation Center and the conduct of an Exit Conference to consolidate the Committee’s findings, comments, and recommendations for both infrastructure projects. During the Exit Conference for the Allen Municipal Wharf Project, it was reported that the wharf currently measures 66.2 meters in length and 14.5 meters in width, out of the targeted 106 meters. The project remains ongoing, with no major defects observed. However, the Committee recommended updating the project billboard to reflect the remaining 40 meters yet to be completed. The DILG-NSPO also emphasized proper safekeeping and systematic filing of project documents to ensure readiness for possible DENR inspection. Technical recommendations included the use of watertight sheet piles, proper compaction to prevent water ponding, installation of safety barricades and signages, and adequate backfilling to maintain structural integrity. Meanwhile, the Pambujan Evacuation Center, a two-storey structure with a one-year completion target, is currently under construction. While work is ongoing, detailed project information is not yet fully visible on-site. The

	onset of oxidation in some steel bars was observed, prompting a recommendation to accelerate construction activities to prevent material deterioration. The Committee also underscored the importance of proper installation of structural components and the availability of appropriate equipment to ensure quality and efficiency.
Next Steps/ Steps to be undertaken	• Finalize and submit the consolidated monitoring and Exit Conference report to concerned offices. • Ensure immediate updating of the project billboard for the Allen Municipal Wharf Project. • Monitor compliance with technical recommendations, particularly on sheet piling, compaction, safety measures, and backfilling works. • Coordinate with the contractor of the Pambujan Evacuation Center to address material oxidation concerns and expedite construction activities. • Conduct follow-up inspections to track progress and ensure adherence to quality and safety standards.
