

PROVINCIAL PROJECT MONITORING COMMITTEE

Excerpts from the Minutes of the Provincial Project Monitoring Committee (PPMC) Meeting held on August 26, 2026 at the Provincial Planning and Development Office, 2/F, Provincial Capitol Bldg., Brgy. Dalakit, Catarman, Northern Samar.

PPMC RESOLUTION NO. 5, SERIES OF 2026

A RESOLUTION STRENGTHENING THE MONITORING AND EVALUATION FUNCTION OF THE PPMC THROUGH ENHANCED COORDINATION AND COLLABORATION WITH THE LOCAL ROAD MANAGEMENT TEAM (LRMT) AND OTHER MONITORING BODIES.

WHEREAS, the **Provincial Project Monitoring Committee (PPMC)** is tasked to monitor and evaluate the implementation of development projects and programs within the Province, whether funded by the National Government, the Provincial Government, or other sources, and to identify and help address issues, bottlenecks, delays, and other concerns affecting project implementation;

WHEREAS, the **Local Road Management Team (LRMT)** was organized primarily to facilitate the preparation, implementation, and updating of the **Local Road Network Development Plan (LRNDP)** and to support the Province in accessing and implementing national government assistance for local road infrastructure projects, including those funded under the **Department of the Interior and Local Government (DILG) Conditional Matching Grant to Provinces (CMGP)**;

WHEREAS, following the completion of the CMGP-funded projects, the LRMT has continued to convene and perform relevant coordination and monitoring activities concerning provincial road infrastructure projects implemented by the **Provincial Engineering Office (PEO)** and other concerned agencies, including the **Department of Public Works and Highways (DPWH)**;

WHEREAS, the status, physical accomplishments, implementation issues, and other concerns involving provincial road infrastructure projects discussed during LRMT meetings substantially overlap with, and may complement, the infrastructure project monitoring reports and updates regularly presented by the PEO and other implementing agencies during PPMC meetings;

WHEREAS, the PPMC recognizes that the respective mandates, functions, technical expertise, and institutional linkages of the PPMC and LRMT may complement one another in promoting more effective project monitoring, particularly in the areas of **project status validation, identification of implementation issues and bottlenecks, technical coordination, information-sharing, and formulation of appropriate recommendations**;

WHEREAS, there is a need to establish stronger coordination and collaboration between the PPMC, LRMT, and other project monitoring bodies to avoid unnecessary duplication of monitoring activities, facilitate the timely exchange and consolidation of project information, and maximize available technical and institutional resources for effective project oversight;

WHEREAS, enhanced coordination among the PPMC, LRMT, and other concerned monitoring bodies will contribute to a more systematic and responsive monitoring mechanism, particularly for infrastructure projects requiring inter-agency coordination or immediate attention to implementation issues and bottlenecks;

NOW, THEREFORE, on motion duly seconded, **BE IT RESOLVED**, as it is hereby **RESOLVED**, to strengthen the coordination and collaboration between the **Provincial Project Monitoring**

Committee (PPMC), the Local Road Management Team (LRMT), and other concerned project monitoring bodies, consistent with their respective mandates and functions;

RESOLVED FURTHER, that the **PPMC Secretariat** is hereby directed to initiate and facilitate appropriate discussions with the LRMT and other concerned monitoring bodies for the purpose of identifying and establishing practical mechanisms for:

1. **Regular sharing and consolidation of project monitoring information and updates**, particularly on infrastructure projects of common concern;
2. **Coordination of monitoring activities**, whenever practicable, to minimize duplication of efforts and maximize available technical and institutional resources;
3. **Identification, validation, and documentation of project implementation issues, delays, and bottlenecks** requiring appropriate intervention;
4. **Referral and coordination of technical or implementation concerns** to the appropriate implementing office, agency, or authority for proper action;
5. **Sharing of technical expertise, monitoring findings, and recommendations** that may assist the PPMC and other monitoring bodies in the performance of their respective mandates; and
6. **Development of other appropriate coordination mechanisms**, as may be agreed upon by the concerned bodies, to improve the efficiency, responsiveness, and effectiveness of project monitoring and evaluation within the Province.

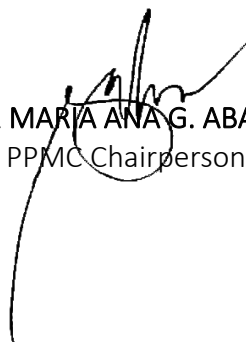

RESOLVED FINALLY, that the foregoing coordination and collaboration shall **not diminish, supersede, or transfer the respective mandates and responsibilities** of the PPMC, LRMT, implementing offices, or other government agencies, but shall instead serve to complement and strengthen their respective project monitoring and oversight functions.

UNANIMOUSLY APPROVED this 26th day of August 2026 at Catarman, Northern Samar.
