POST ACTIVITY REPORT

Webinar on Strengthening the Functionality of Local Project Monitoring Committees (LPMCs) in Eastern Visayas

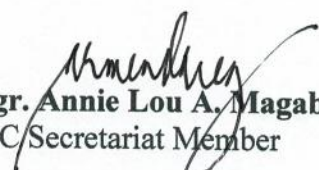

The Seminar was successfully conducted via an online platform on March 25, 2026, with the participation of LPMC members, CSOs, and other stakeholders.

The activity focused on enhancing the capacity of participants in project monitoring and evaluation through discussions on the RPMES Operational Guidelines, LPMC Monitoring and Evaluation Process Flow, Functionality Assessment Tools, RPMES Forms, and Contract Management and Construction Supervision. The presentation of the activity outline highlighted these key topics, providing participants with a clearer understanding of their roles and responsibilities. An open forum was also conducted to address issues and share best practices.

One of the highlights of the webinar was the introduction of a new portal for the submission of Means of Verification (MOVs). From the perspective of a Secretariat member, the system is more practical, user-friendly, and better suited to current monitoring and reporting requirements compared to the previous platform.

Overall, the webinar improved participants' knowledge and strengthened coordination among stakeholders, contributing to more transparent, accountable, and efficient implementation of local development projects.

POST ACTIVITY REPORT

Webinar on Orientation on the Local Project Monitoring Committee (LPMC) Operational Guidelines and Basic Engineering Concept for Non-Engineers

The Seminar was successfully conducted via an online platform on March 12, 2026, with the participation of LPMC members, CSOs, and other stakeholders.

The seminar was conducted to enhance the capacity and functionality of LPMC members.

The session covered the committee's roles and responsibilities, basic engineering concepts, and common findings and recommendations on vertical structures and road projects. Participants were oriented on issues such as poor workmanship, substandard materials, and non-compliance with project specifications, with corresponding guidance on addressing these challenges.

A key highlight was the discussion on strengthening LPMC functionality through improved coordination, documentation, and timely submission of monitoring reports. The activity successfully increased participants' understanding and confidence in monitoring local projects, supporting more effective oversight and accountability.

Another highlight was the discussion on the criteria for the **Subaybayanihan Awardee**. This clarified a question we previously had, as our LGU has consistently been recognized as a High Functional LGU under the Functionality Assessment Tool, helping us understand why we had not yet qualified for the award.
