14th PICE Region VIII Technical Conference	To enhance the technical knowledge and professional competencies of civil engineers through discussions on current engineering practices, construction quality and standards, infrastructure development, project management, disaster resilience, environmental considerations, and other relevant developments in the civil engineering profession, while providing opportunities for knowledge-sharing and professional collaboration.	September 11-12, 2026	A	LPMC Chairperson	All members of the Project Monitoring Committee / Licensed Civil Engineers in Region VIII	5	2	7	The conference enhanced the participants' technical knowledge and understanding of current engineering practices, standards, and developments. The discussions provided relevant and practical insights that can be applied to project planning, implementation, monitoring, and quality assurance. Participants also gained valuable opportunities for knowledge-sharing and professional interaction with fellow engineers. Overall, the conference was informative, relevant, and beneficial to the participants' continuing professional development.
